In order to meet the increasing demand in East Germany for metallic magnesium, the East German Council of Ministers decreed at its session held on 5 March 1953 that production equipment for the manufacture of 7,200 to 8,000 metric tons of metallic magnesium per year is to be installed in Elektrochemisches Kombinat Rittersfeld (EKB). The project included in the investment plan for WV Chemie for the construction of equipment to produce 4,000 metric tons of magnesium per year has been cancelled. In accordance with the preliminary project plan, the magnesium plant is to be constructed in 1953 and 1954. Investments for the project amount to 39,000,000 MZ; 15,000,000 MZ have been included in the WV Chemie investment plan for 1953. It is planned to construct the plant in two stages so that by 1954 production of 2,500 tons of magnesium will be guaranteed. Construction of the plant buildings is to be so planned that the second stage of construction will increase the capacity by 4,000 tons per year.
